

MACROLIBROS

COMPROMISO CON LA GESTIÓN FORESTAL RESPONSABLE

We are a company that uses paper as its main raw material and, therefore, we wish to promote responsible forest management to meet the social, economic, ecological, cultural, and spiritual needs of current and future generations.

MACROLIBROS wishes to express through this document its commitment to the Chain of Custody certifications, putting all the necessary means to implement and maintain such chain of custody systems and ensuring compliance with all the requirements.

MACROLIBROS undertakes to control the origin of the wood used in the manufacture of the paper and cardboard used in its production processes in order to exclude paper and cardboard manufactured with material from the following sources:

- Forest areas in which civil and traditional rights are violated.
- Forest areas in which labor standards and fundamental principles and rights are not met (according to the ILO Declaration, 1998).
- Forest areas in which high conservation values are threatened.
- Forest areas in which genetically modified trees have been introduced.
- Forest areas in which illegal logging takes place.
- Natural forests that have been converted into plantations or in other non-forest uses.

MACROLIBROS ensures that:

- The company does not prevent its workers from freely associating, electing their representatives, or negotiating collectively with the company.
- No forced labor takes place in its facilities.
- The company does not employ workers under the minimum legal age established in Spain.
- The company does not impede equal opportunities and equal treatment of workers.
- The working conditions do not put in danger the safety or health of its employees.

The protection of the environment is a determining factor in the development of our activity and MACROLIBROS will ensure the awareness and training of its employees. The active participation of our staff in the Chain of Custody System implemented will be encouraged, and any suggestions made in this respect will be valued and given special attention.

MACROLIBROS management hopes and wishes to collaborate actively with the ultimate goal of ensuring that the world's forests are managed responsibly, and that their many functions are protected for present and future generations.
